

Commercial Drain & Grease Trap

Where to Use

Restaurants | Commercial Kitchens |
Hotels | Hospitals | Food Manufacture |
Animal Processing

Features

- All-Natural Enzyme-Producing Bacteria
- Eliminates Drain & Grease Trap Odors
- Rapidly Breaks Down & Digests FOGs

Benefits

- Reduces Pumpout Costs
- Provides an Odor-Free Workplace
- Eliminates Clogged Drains

Beyond Environmental offers a full line of biologic solutions that transform contaminants into harmless compounds such as water and CO₂. All of our products utilize the highest quality, scientifically selected microorganisms and environmentally safe surfactants. We offer products and services for wastewater treatment, commercial and industrial degreasing as well as soil remediation. At Beyond Environmental, our goal is to be your partner in protecting the environment for generations to come.

Nothing brings a kitchen to a screeching halt faster than a clogged drain or grease trap. Allowing grease build-up in pipes and grease traps invites excessive plumbing costs, local FOG (fats, oils & grease) program fines, plumbing backups, unpleasant odors, EPA wastewater fines, drain flies, and more.

Eco Strong Commercial Drain & Grease Trap meets the challenging needs of high grease applications. Our multi-strain bacterial formula rapidly breaks down and digests FOGs, starches, proteins and other food waste that builds up in drains and grease traps.

Like most of the equipment in a kitchen, the drains and grease trap require regular maintenance. **Eco Strong Commercial Drain & Grease Trap** is a daily use treatment. To ensure optimal results, use with an automatic dosing pump. When treated with an automatic pump, **Eco Strong Commercial Drain & Grease Trap** has been shown to increase pump-out intervals by as much as 300%.

We also offer two different automatic dosing pumps. These pumps are high quality, accurate, dependable and easy to use. You can choose either a battery-operated pump or a 120-volt option. These pumps will provide the highest degree of dosing certainty both in terms of consistency and timing.

Commercial Drain & Grease Trap

Challenge		Solution
High Grease Trap Maintenance Costs	Regularly pumping out the grease trap at our grocery store is a costly, ongoing expense.	Using Eco Strong Commercial Drain & Grease Trap regularly to break down and reduce the FOG in grease traps can drastically reduce the frequency with which pumpouts are needed, saving money every month.
Foul Odors	A few of our drains stink and the smell coming from the grease trap at our restaurant is even worse.	The bacteria in Eco Strong Commercial Drain & Grease Trap uses odor-causing volatile fatty acids (VFA) as an energy source. This eliminates hydrogen sulfide and foul-smelling and corrosive gases.
Slow or Clogged Drains	Our drains never seem to be running properly all the time. When they slow down, it is usually at the worst time. Plumbers are as expensive as doctors nowadays!	Regularly pouring Eco Strong Commercial Drain & Grease Trap down problem drains will allow powerful enzyme producing bacteria to digest common clog culprits keep drains flowing well and clog free.

Drain Directions

Shake before use.

For Slow Drains

Pour 4-6 oz into the drain. Treat daily for one week or until the flow returns to normal.

Initial Drain Maintenance Treatment

Pour a one-time loading dose of 10-12 oz into the drain. Wait one week and begin weekly dosing.

Drain Maintenance

Each week, pour 2-4 oz into the drain.

Grease Trap Directions

For optimal results, start using this product after a pumpout. If that is impractical, double dose your grease trap for a month.

Grease Trap Automatic Treatment

Using an automatic pump ensures accurate and consistent dosing. Install the product supply line as close to the trap as possible. See dosing table for daily treatment amounts.

Grease Trap Manual Treatment

When treating without a pump, pour the product directly into the drain closest to the grease trap. Treat every day at the same low flow time. See dosing table for daily treatment quantities.

Grease Trap Vol/Gal	Daily Dose Oz/Day	Life of 5 Gallon Pail in Days
Less than 100	10 oz.	64
101-250	21 oz.	30
251-500	42 oz.	15
501-750	64 oz.	10
751-1000	86 oz.	7

Note: Always treat at low flow times such as overnight. Do not use boiling water, bleach, antibacterial or other chemical products in conjunction with **Eco Strong Commercial Drain & Grease Trap** as it will negatively impact performance.

Product Code	Product Name	Quantity	Case Count	Cases Per Pallet
CDGT14	Commercial Drain & Grease Trap	1 Gallon	4	45
