

Drain & Septic ER

Where to Use

Sinks | Garbage Disposals | Drains | Toilets |
Septic Systems | Waste Sumps

Features

- Bio-Enzymatic Cleaning
- Chemical-Free
- Clears Old Build-Ups

Benefits

- Keep Drains Clog-Free
- Eliminate Odor Complaints
- Reduce Septic System Expenses

Beyond Environmental

offers a full line of biologic solutions that clean and transform contaminants into water and harmless CO₂. All of our products utilize the highest quality, scientifically selected enzyme producing microorganisms and environmentally safe surfactants. We offer products and services for pet care, drain and septic management, commercial waste water treatment, industrial degreasing as well as soil remediation. At Beyond environmental our goal is to be your partner in protecting the environment for generations to come.

Eco Strong Drain & Septic ER is our strongest, intensive care drain and septic treatment. It is a highly concentrated blend of enzyme producing bacteria and specialized enzymes selected for their ability to break down and digest existing build-ups, eliminate odors and prevent new clogs. This even includes hair and paper! This makes it the most powerful and effective natural drain and septic treatment on the market.

The enzyme producing bacteria in **Eco Strong Drain & Septic ER** work in harmony with your septic tank’s natural bacteria to restore and maintain your system’s balance. Continual use of this product helps to prevent foul odors, clogs, back-ups, complaints from neighbors, excessive pump-outs and ponding drain fields.

There are many reasons why your drain slows or even clogs: hair, toothpaste, and shaving cream create a sticky mess in pipes. Add soap residue, fats, oils, and grease and you will eventually have a clogged or slow flowing drain. Using harsh chemicals is not an option for septic systems because it will ruin the biologic balance of your septic system.

Until now there was simply not an effective septic system safe product that can remove clogs associated with hair.

Eco Strong Drain & Septic ER has been carefully designed to not only help keep pipes running smoothly, but to also aid in optimizing your septic system’s performance.

| Challenge | | Solution |
|-------------------------------|---|--|
| Slow or Clogged Drains | Our drains never seem to be running properly. When they slow down, it is usually at the worst time. Plumbers are as expensive as doctors nowadays. | Powerful enzyme producing bacteria rapidly digests common clog culprits including hair, keeping drains flowing freely and clog free. |
| Foul Odor | We are on a septic system and the drains in our kitchen, bathrooms and garburator all stink! | Eco Strong Drain & Septic ER dramatically increases the efficiency of the septic system. A happy septic system emits no odor which is what is causing your drains to smell bad. |
| Harsh Chemicals | Clogs created by hair are a constant problem and natural drain opens don't work well with hair. Chemical drain opens however destroy the septic system. | Eco Strong Drain & Septic ER has been specifically developed to tackle the problem of hair in drains while helping your septic system. |

Directions

Always treat at low flow times such as at night. Do not use boiling water, bleach, antibacterial, or other chemical products in conjunction with **Eco Strong Drain & Septic ER** as it will negatively impact performance.

Initial Septic Treatment

For systems up to 1,000 gallons, mix 2 lbs of **Eco Strong Drain & Septic ER** in 5 gallons of warm water, let stand for 1/2 hour, and pour it directly into the tank or flush down a main floor toilet.

Maintenance Septic Treatment

Mix a 1/2 cup of **Eco Strong Drain & Septic ER** in a gallon of warm water, let stand for 1/2 hour, and flush down the toilet.

Initial Drain Treatment

Treat all drains for 3 consecutive days. See dosing amounts below.

Drain & Septic Maintenance

Treat monthly.

Shower, Sink & Tub

Mix one tablespoon **Eco Strong Drain & Septic ER** in one pint of warm water, let stand for a few minutes, and pour into drain.

Toilets

Mix two tablespoons of **Eco Strong Drain & Septic ER** in one pint of warm water, let stand for a few minutes, pour and then flush.

Floor Drains & Waste Sumps

Mix three tablespoons of **Eco Strong Drain & Septic ER**, let stand for a few minutes, and pour.

| Product Code | Product Name | Quantity | Case Count | Cases Per Pallet |
