

Septic Tank Treatment

Where to Use

Homes or Businesses on Individual or Cluster Septic Systems

Features

- All Natural & Chemical-Free
- Maintain Tank's Natural Balance
- Eliminates Foul Odors

Benefits

- Eliminates the Worry of Sewage Back-Up
- All Drains Flow Freely
- Reduces Maintenance Expenses

Beyond Environmental

offers a full line of biologic solutions that clean and transform contaminants into water and harmless CO₂. All of our products utilize the highest quality, scientifically selected enzyme producing microorganisms and environmentally safe surfactants. We offer products and services for pet care, drain and septic management, commercial waste water treatment, industrial degreasing as well as soil remediation. At Beyond environmental our goal is to be your partner in protecting the environment for generations to come.

More than 21 million households in the United States depend on individual or community cluster septic systems to treat their wastewater. If a septic system isn't correctly maintained, owners run the risk of dangerous and costly failures. A failed or poorly functioning septic system is a risk to human, animal, and environmental health.

Like most components of your home, septic systems require routine maintenance and like most components, maintenance needs can change over time. For that reason, we offer two different septic solutions – **Eco Strong Septic Tank Treatment Liquid** and **Eco Strong Septic Tank Treatment Packs**. For troubled systems, our **Eco Strong Septic Tank Treatment Liquid** has the cleaning power to digest tough clogs. Our **Eco Strong Septic Tank Treatment Packs** are a convenient flushable packet for regular maintenance to keep you system flowing freely.

Eco Strong Septic Tank Treatments contain billions of beneficial enzyme producing bacteria that eliminate bad odors while working in harmony with your tanks natural bacteria to restore and maintain your system's balance. Continual use will prevent foul smells, unnecessary pump-outs, and pooling drain fields.

Challenge		Solution
Slow Drain	Water is accumulating in our sinks faster than it can drain.	Adding Eco Strong Septic Tank Treatment to your septic system will speed up the natural breakdown of solids, including fats, oils, and greases (FOG), declogging the system.
Foul Odor	Foul odors are coming from our sinks, showers, toilets and the septic bed.	The enzyme producing bacteria in our Eco Strong Septic Tank Treatment products use volatile fatty acids (VFAs) as an energy source, dramatically reducing foul odors not just masking them.
Wet Grass	Water is pooling on the grass around our septic bed.	Regular use of either Eco Strong Septic Tank Treatment will establish thriving colonies of bacteria, restoring the natural balance to your septic tank and reducing clogs that lead to pooling water.

Directions for Septic Tank Treatment Liquid

Always treat at low flow times such as overnight. The use of boiling water, bleach, or antibacterial or other chemical products in conjunction with **Eco Strong Septic Tank Treatment** will negatively impact performance.

For Slow Drains & Odor Problems

Use Septic Treatment Liquid, shake vigorously before each use. Pour 32 oz. of **Eco Strong Septic Tank Treatment Liquid** directly into the tank or pour into a main floor toilet and flush. Do not flush again for 4-5 hours. Continue to treat each night for 5 nights or until problem is resolved.

Maintenance-Initial Treatment

Always begin a maintenance program with a one-time 32 oz. treatment. Pour 32 oz. of **Eco Strong Septic Tank Treatment Liquid** into a main floor toilet and flush. Do not flush again for 4-5 hours.

Maintenance-Monthly

Pour 8-10 oz. into a main floor toilet and flush. Do not flush again for 4-5 hours. Or use a single **Eco Strong Septic Tank Pack** once per month. Always use treatments at low flow times such as overnight.

Directions for Septic Tank Treatment Packs

Toss and flush a water-soluble pack down any toilet connected to the septic system or holding tank, including portable toilets, boats, or RVs. Use one pack per month for systems below 1,500 gallons and 3 per month for systems over 1,500 gallons. Stop using any other odor control products/chemicals.
