

Soil Remediation Granular

Where to Use

In Situ or Ex Situ Soil Remediation |
Land Farming | Biopiles | Surface Spills

Suitability

Rapidly Degrades Most Petroleum

- | | |
|--------------------------|----------------------|
| Hydrocarbons: | • Jet Fuels |
| • BTEX | • Kerosene |
| • Crude Oil | • Lubricating Oils |
| • Diesel | • Motor Oil |
| • Gasoline | • PAHs |
| • Greases | • Paint Thinners |
| • Heating Oils | • Tar |
| • Higher-Range Aromatics | • Transmission Fluid |

Beyond Environmental

offers a full line of biologic solutions that clean and transform contaminants into water and harmless CO₂. All of our products utilize the highest quality, scientifically selected enzyme producing microorganisms and environmentally safe surfactants. We offer products and services for pet care, residential and commercial waste water treatment, industrial degreasing as well as soil remediation. At Beyond environmental our goal is to be your partner in protecting the environment for generations to come.

Eco Strong Soil Remediation Granular is a faster, more economical granular bioremediation product containing many strains of naturally occurring, specially “trained” non-GMO microbes. Microbes are held on the surface of natural peat moss granules, ensuring a completely natural solution.

Our proprietary microbial development process results in microbes that deliver faster results while only requiring soil moisture contents between 15% and 20%, thus saving significantly on labor.

Eco Strong Soil Remediation Granular is a one-recipe-fits-all, granular bioremediation solution to remediate virtually any hydrocarbon contaminant, the group of VOCs collectively known as BTEX which are comprised benzene, toluene, ethylbenzene and xylene, as well as polycyclic aromatic hydrocarbons (PAHs).

Soil Remediation Granular

HOW IT WORKS

1 Combine microbe-infused peat moss granules with the micronutrients.

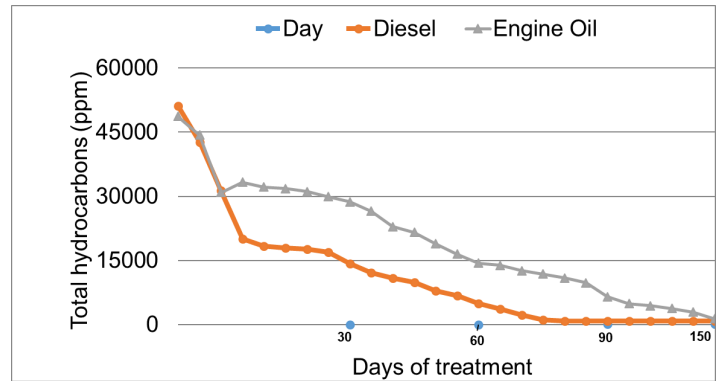

2 The microbes will degrade and digest the contamination, returning the soil to its original uncontaminated state.

3 Water and carbon dioxide are the resulting byproducts.

Bioremediation is a natural process. Results may vary based on temperature, age and type of contamination and type and density of soil. For best results, maintain the carbon, nitrogen, and phosphorus (CNP) ratio at 100:10:1. Contact your supplier for advice

TECHNICAL INFORMATION

Form	Granular
Appearance	Black
Micronutrients	Blue
pH	7.0
Shelf Life	2 Years
Storage Temperature	> -60° F (-50° C) & < 120° F (50° C)
Ideal Operating Temperature	Between 40° F (5° C) and 100° F (38° C)
Regulatory	Not regulated as a hazardous material

Challenge	Solution
Time I've tried other remediation products and they took forever to work.	Eco Strong Soil Remediation Granular has been shown to reduce the total parts of hydrocarbon contamination dramatically faster than other bioremediation treatments.
Cost I agree that bioremediation is the best way to clean up contaminated soil, but it's such a time-consuming process that I'm not sure if the results are worth it.	Here's what makes Eco Strong Soil Remediation Granular different – our microbes are trained. Yes, trained! Our non-GMO microbes go through a multi-step proprietary "school," and they emerge hyperactive and hungry for hydrocarbons. They are most effective with a lower soil moisture content which also saves labor. The "trained" microbial strains will consume general hydrocarbons as well as BTEX and PAHs, all within the same treatment. One product is all you need which makes product selection simple!
Remote & Harsh Environments Our site is in a remote area with freezing temperatures and we can't store liquid remediation products for too long.	Eco Strong Soil Remediation Granular can be stored over an extended period of time in a very wide range of temperatures. Because it is not a liquid, it can withstand storage temperatures as low as -60° F.

Product Code	Product Name	Quantity	Case Count	Cases Per Pallet
SRG54	Soil Remediation Granular	5 lbs.	4	60
SRG27	Soil Remediation Granular	27 lbs.	1	36
SRG250	Soil Remediation Granular	250 lbs.	1	4

*These products have a 2-year shelf life and do not contain any ingredient listed on California Proposition 65 and are not regulated as hazardous.
